EARTH SCIENCES DIVISION

Publications 5983-6332

1. Geothermal Subsidence Research Program Plan, 1977, Energy and Environment Division: Lawrence Berkeley Laboratory, University of California, LBL-5983, 111 p.

2. Davey, J.V., 1977, Survey Report: Study of information/education discussions with private industries and public institutions on the direct-heat utilization of geothermal energy: Lawrence Berkeley Laboratory, University of California, LBL-5988, 29 p.

3. Tsang, C-F., McEdwards, D.G., Narasimhan, T.N., and Witherspoon, P.A., 1977, Variable flow well test analysis by a computer assisted matching procedure: Lawrence Berkeley Laboratory, University of California, LBL-5994, 12 p.

4. Seth, M., and Vermeulen, T., 1977, Interaction of a sub-bituminous coal with a strong acid and a strong base: Lawrence Berkeley Laboratory, University of California, LBL-5997, 103 p.

5. Silvester, L.F. and Pitzer, K.S., 1977, Thermodynamics of electrolytes. VIII. High-temperature properties, including enthalpy and heat capacity, with application to NaCl: Lawrence Berkeley Laboratory, University of California, LBL-6217, 37 p.

6. Green, M.A., Pines, H.S., Pope, W.L., and Williams, J.D., 1977, Thermodynamic and cost optimization using program GEOTHM: Lawrence Berkeley Laboratory, University of California, LBL-6303, 4 p.

7. Green, M.A., Doyle, P.A., Pines, H.S., Pope, W.L., and Silvester, L.F., 1977, The optimization of alternative energy cycles using program GEOTHM: Lawrence Berkeley Laboratory, University of California, LBL-6308, 18 p.

8. Tsang, C-F., Lippmann, M.J., and Witherspoon, P.A., 1977, Underground aquifer storage of hot water from solar energy collectors: Lawrence Berkeley Laboratory, University of California, LBL-6309, 10 p.

9. Snoke, A.W., Bowman, H.R., and Hebert, A.J., 1977, The Preston Peak ophiolite, Klamath Mountains, California, an immature island arc: Petrochemical evidence: Lawrence Berkeley Laboratory, University of California, LBL-6322, p. 67-79. [Published by California Division of Mines and Geology]

10. Beyer, J.H., 1977, Telluric and D.C. resistivity techniques applied to the geophysical investigation of basin and range geothermal systems, Part I: The E-Field Ratio Telluric Method: Lawrence Berkeley Laboratory, University of California, LBL-6325, 135 p.

11. Beyer, J.H., 1977, Telluric and D.C. resistivity techniques applied to the geophysical investigation of Basin and Range geothermal systems, Part II: A numerical model study of the dipole-dipole and Schlumberger resistivity methods: Lawrence Berkeley Laboratory, University of California, LBL-6325, 211 p.

12. Beyer, J.H., 1977, Telluric and D.C. resistivity techniques applied to the geophysical investigation of Basin and Range geothermal systems, Part III: The analysis of data from Grass Valley, Nevada: Lawrence Berkeley Laboratory, University of California, LBL-6325, 115 p.

13. Tsang, C-F., Goranson, C.B., Lippmann, M.J., and Witherspoon, P.A., 1977, Modeling underground storage in aquifers of hot water from solar power systems: Lawrence Berkeley Laboratory, University of California, LBL-6327, 7 p.

14. Lippmann, M.J., Tsang, C-F., and Witherspoon, P.A., 1977, Analysis of the response of geothermal reservoirs under injection and production procedures: Lawrence Berkeley Laboratory, University of California, LBL-6328, 15 p.

15. Dey, A. and Morrison, H.F., 1977, An analysis of the bipole-dipole resistivity method for geothermal exploration: Lawrence Berkeley Laboratory, University of California, LBL-6332, 60 p.
